Summary

Full-stack Web Developer designing and delivering scalable web systems and SaaS platforms. Expertise in **Django**, **FastAPI**, **Node.js**, **NestJS**, **GraphQL**, and **Next.js**. Experienced building modern UIs with **React** + **TypeScript** and styling with **Tailwind CSS**. Skilled in API development, database design with **PostgreSQL**, frontend build configuration and optimization using **Webpack**, **Babel**, loaders, plugins, code splitting, and **ESLint**, and automated deployments with **GitLab CI/CD**. Familiar with containerized workflows using **Docker** and cloud environments including **Google Cloud (GCP)** and **AWS**.

Technical Skills

Backend: Django, FastAPI, Node.js, NestJS, Laravel, CakePHP, GraphQL
Frontend: Next.js, React, TypeScript, JavaScript, AngularJS, Redux Toolkit, Tailwind CSS, SCSS, Bootstrap, shadcn/ui, Ant Design
Build/Tooling: Webpack, Babel, ESLint, CSS/SCSS Loaders, Webpack Plugins, Path Aliases, Environment Configuration, Code Splitting, Build Optimization, Gulp
Databases: PostgreSQL, MySQL
DevOps/Cloud: Docker, GitLab CI/CD, AWS (EC2, S3, RDS, Elastic Beanstalk, Load Balancers, Route 53), Google Cloud (GCP)
Monitoring: Prometheus, Grafana
Integrations: REST APIs, GraphQL APIs, Mailchimp, CRM Systems, Sticky.io, UltraCart
Methodologies/Practices: SCRUM, Requirements Analysis, System Architecture, Maintenance, Performance Optimization

Work Experience

Full-stack **May 2024 – Present**
CER Management Group (cermanagementgroup.com) *Remote / Managua*

- Developed a multi-company payroll tracking system using Django and Django REST Framework, integrating with Paycor for seamless time and attendance data synchronization and supporting payroll workflows for both W-2 employees and 1099 independent contractors.
- Built interactive frontend interfaces with React 19, TypeScript, Redux Toolkit, and Webpack, delivering a responsive user experience for payroll management across multiple organizations. Configured Webpack with Babel transpilation, CSS/SCSS loaders, plugins, asset handling, path aliases, environment variables, code splitting, and development/production build optimization, while using ESLint to maintain code quality and consistency.
- Designed PostgreSQL database schemas to support complex payroll calculations, company hierarchies, and user access controls.
- Developed a multitenant inventory management system with FastAPI and React/TypeScript, creating a centralized platform for managing companies, warehouses, products, and inventory transfers.
- Built robust asynchronous RESTful APIs with FastAPI and SQLAlchemy to handle core business logic for invoices, suppliers, and multi-branch operations.
- Implemented state management with Redux Toolkit for complex UI interactions.
- Created dynamic forms for the recruitment process, enabling seamless data collection and management for potential new employees.
- Orchestrated application deployment using Docker and Docker Compose, streamlining local development with containerized backend and frontend services.
- Configured GitLab CI/CD pipelines for automated deployments and set up monitoring with Prometheus and Grafana to track application performance and system health.

Full-stack **Nov 2019 – Jan 2024**
Nicasource (nicasource.com) *Remote / Managua*

- Architected and built EdThrive, a multi-tenant SaaS platform designed to improve team meeting efficiency for educators, featuring meeting scheduling, task management, and collaboration tools.
- Deployed and managed EdThrive on AWS cloud infrastructure including S3 for storage, RDS for PostgreSQL databases, Elastic Beanstalk for application hosting, load balancers for traffic distribution, and Route 53 for DNS management.
- Implemented CI/CD pipelines using GitLab with Git Flow branching strategy for EdThrive, enabling automated testing and deployment across development, staging, and production environments.

- Designed and implemented GraphQL APIs using NestJS to enable flexible and efficient data fetching for the EdThrive frontend application.
- Built responsive user interfaces with Next.js and React, incorporating features for meeting organization, action item tracking, and team collaboration.
- Integrated third-party services and APIs to extend platform functionality and enhance user experience.
- Delivered 10+ web projects for external and internal customers, consistently meeting project requirements and deadlines.

Full-stack **Nov 2015 – Jul 2019**
Sunpyramid Health (sunpyramid-health.com) *Remote / Managua*

- Developed and maintained multiple eCommerce sites using Laravel, CodeIgniter, and CakePHP, serving a worldwide health and wellness brand.
- Integrated Sticky.io payment platform to enable subscription billing, recurring payments, and automated payment recovery for customer transactions.
- Implemented UltraCart eCommerce platform for online checkout, payment processing, and order management across multiple product lines.
- Converted Adobe XD designs into responsive web interfaces using Bootstrap and JavaScript to enhance user experience across devices.
- Integrated external services including Mailchimp for email marketing and CRM systems for customer relationship management.
- Maintained PostgreSQL databases and improved backend stability and performance for high-volume eCommerce operations.

Web Developer **Feb 2014 – Oct 2015**
Ooqia (ooqia.com) *Remote / Managua*

- Collaborated with designers, project managers, and stakeholders to deliver features aligned with business requirements and user needs.
- Developed and maintained web applications and interactive gaming features using AngularJS, PHP, MySQL, and jQuery.
- Collaborated with stakeholders to gather requirements, analyze business needs, and translate them into scalable technical solutions.
- Designed and optimized database schemas, improving data integrity and application performance.
- Implemented bug fixes, performance enhancements, and new functionality to improve user experience and system maintainability.
- Enhanced existing systems by implementing new features, resolving bugs, and optimizing application functionality and user experience.
- Contributed to the full software development lifecycle, from requirements analysis and development to testing and deployment.

Education

Bachelor's in Computer Engineering **Feb 2008 – Feb 2013**
National University of Engineering (UNI) *Managua, Nicaragua*
