Professional Summary

Full-stack software engineer with years developing SaaS and enterprise applications across staffing, time and attendance, payroll, route operations, inventory, and e-commerce. Experienced with Python, FastAPI, Django, React, TypeScript, PostgreSQL, and secure multi-tenant architecture. Brings together API engineering, AWS and DigitalOcean deployments, performance monitoring, Playwright testing, and AI-assisted Spec-Driven Development (SDD).

Technical Skills

Languages: Python, TypeScript, JavaScript, Go, PHP, SQL

Backend and APIs: FastAPI, Django, Django REST Framework, SQLAlchemy (async), asyncpg, Pydantic, Node.js, NestJS, Laravel, REST, GraphQL

Frontend: React, Next.js, Redux Toolkit, React Hook Form, Zod, Tailwind CSS, shadcn/ui, AngularJS

Database and Security: PostgreSQL, MySQL, Alembic, query optimization, pg_stat_statements, multitenancy, JWT, RBAC, data access scopes

Cloud and Observability: DigitalOcean App Platform, Managed PostgreSQL, AWS (S3, RDS, Elastic Beanstalk, Route 53), GCP, Docker, GitLab CI/CD, Prometheus, Grafana

Testing and AI Engineering: Playwright (E2E), OpenAI Codex, Claude (Anthropic), Spec-Driven Development (SDD), technical specifications, code review

Additional Tooling and Integrations: Git, Linux, Webpack, Babel, ESLint, Paycor, Mailchimp, Sticky.io, UltraCart

Professional Experience

CER Management Group — **May 2024 – Present**
Full-Stack Developer — *Remote / Managua, Nicaragua*
Headquarters: Athens, Georgia, USA | U.S. company

- **CER Staffing:** Developed recruitment and employee onboarding workflows with company-scoped roles and permissions.
- **CER Time:** Built scheduling, timecards, pay periods, reporting, kiosk attendance, and mobile workflows.
- **CER Route:** Developed field-route workflows for geolocation, mileage tracking, and trip closure.
- **CER Inventory:** Developed warehouse stock management, inter-location transfers, and supplier invoicing.
- **CER Payroll:** Built payroll administration workflows and Paycor integration for W-2 and 1099 workers.
- **Business impact:** Improved operational efficiency at CER Management Group through software supporting recruiting, timekeeping, payroll, field routes, and inventory administration.
- **Platform architecture:** Built asynchronous REST APIs with FastAPI, Django, SQLAlchemy, and PostgreSQL; implemented subdomain-based tenant resolution, role-based access control (RBAC), company-scoped permissions, and Alembic migrations.
- **AI-assisted engineering and testing:** Applied OpenAI Codex and Anthropic Claude in Spec-Driven Development (SDD) workflows and code reviews; used Playwright for browser-based end-to-end (E2E) testing.
- Built responsive administration, scheduling, onboarding, and kiosk/mobile workflows with React, TypeScript, and Redux Toolkit.
- Instrumented API request and database timings with Prometheus; used Grafana and PostgreSQL query analysis to investigate performance bottlenecks.
- Deployed DEV/PROD services on DigitalOcean App Platform with managed PostgreSQL, SSL connections, Docker, and GitLab CI/CD.

Nicasource **Nov 2019 – Jan 2024**

Full-Stack Developer *Remote / Managua, Nicaragua*

Headquarters: Managua, Nicaragua | International company

- Architected and built **EdThrive**, a multi-tenant SaaS platform designed to improve team meeting efficiency for educators, featuring meeting scheduling, task management, and collaboration tools.
- Deployed and managed EdThrive on AWS cloud infrastructure, including S3 for storage, RDS for PostgreSQL databases, Elastic Beanstalk for application hosting, load balancers for traffic distribution, and Route 53 for DNS management.
- Implemented CI/CD pipelines using GitLab and a Git Flow branching strategy for EdThrive, enabling automated testing and deployment across development, staging, and production environments.
- Designed and implemented GraphQL APIs using NestJS to enable flexible and efficient data fetching for the EdThrive frontend application.
- Built responsive user interfaces with Next.js and React, incorporating features for meeting organization, action item tracking, and team collaboration.
- Integrated third-party services and APIs to extend platform functionality and enhance user experience.
- Delivered 10+ web projects for external and internal customers, meeting project requirements and deadlines.

Sunpyramid Health **Nov 2015 – Jul 2019**

Full-Stack Developer *Remote / Managua, Nicaragua*

Headquarters: Los Angeles, California, USA | International company

- Developed and maintained multiple eCommerce sites using Laravel, CodeIgniter, and CakePHP, serving a worldwide health and wellness brand.
- Integrated Sticky.io payment platform to enable subscription billing, recurring payments, and automated payment recovery for customer transactions.
- Implemented UltraCart eCommerce platform for online checkout, payment processing, and order management across multiple product lines.
- Converted Adobe XD designs into responsive web interfaces using Bootstrap and JavaScript to enhance user experience across devices.
- Integrated external services including Mailchimp for email marketing and CRM systems for customer relationship management.
- Maintained PostgreSQL databases and improved backend stability and performance for high-volume eCommerce operations.

OOQIA **Feb 2014 – Oct 2015**

Web Developer *Remote / Managua, Nicaragua*

Headquarters: Managua, Nicaragua | International company

- Contributed to a web platform enabling museums and schools to create interactive educational experiences.
- Developed web applications and interactive gaming features using AngularJS, PHP, MySQL, and jQuery.
- Integrated Google Maps API into web applications to deliver interactive map functionality.
- Partnered with designers and business stakeholders to deliver features, resolve defects, and improve database schema efficiency.

Education

Bachelor's Degree in Computer Engineering Feb 2008 – Feb 2013

National University of Engineering (UNI) | Managua, Nicaragua
